Shortcodes

Use shortcode `[wh_domain_form]` on any page post to display search domain name form. Use Widget WH Search Domain Form in any widget area to display the form

`[check_domain_name]` displays search domain name results

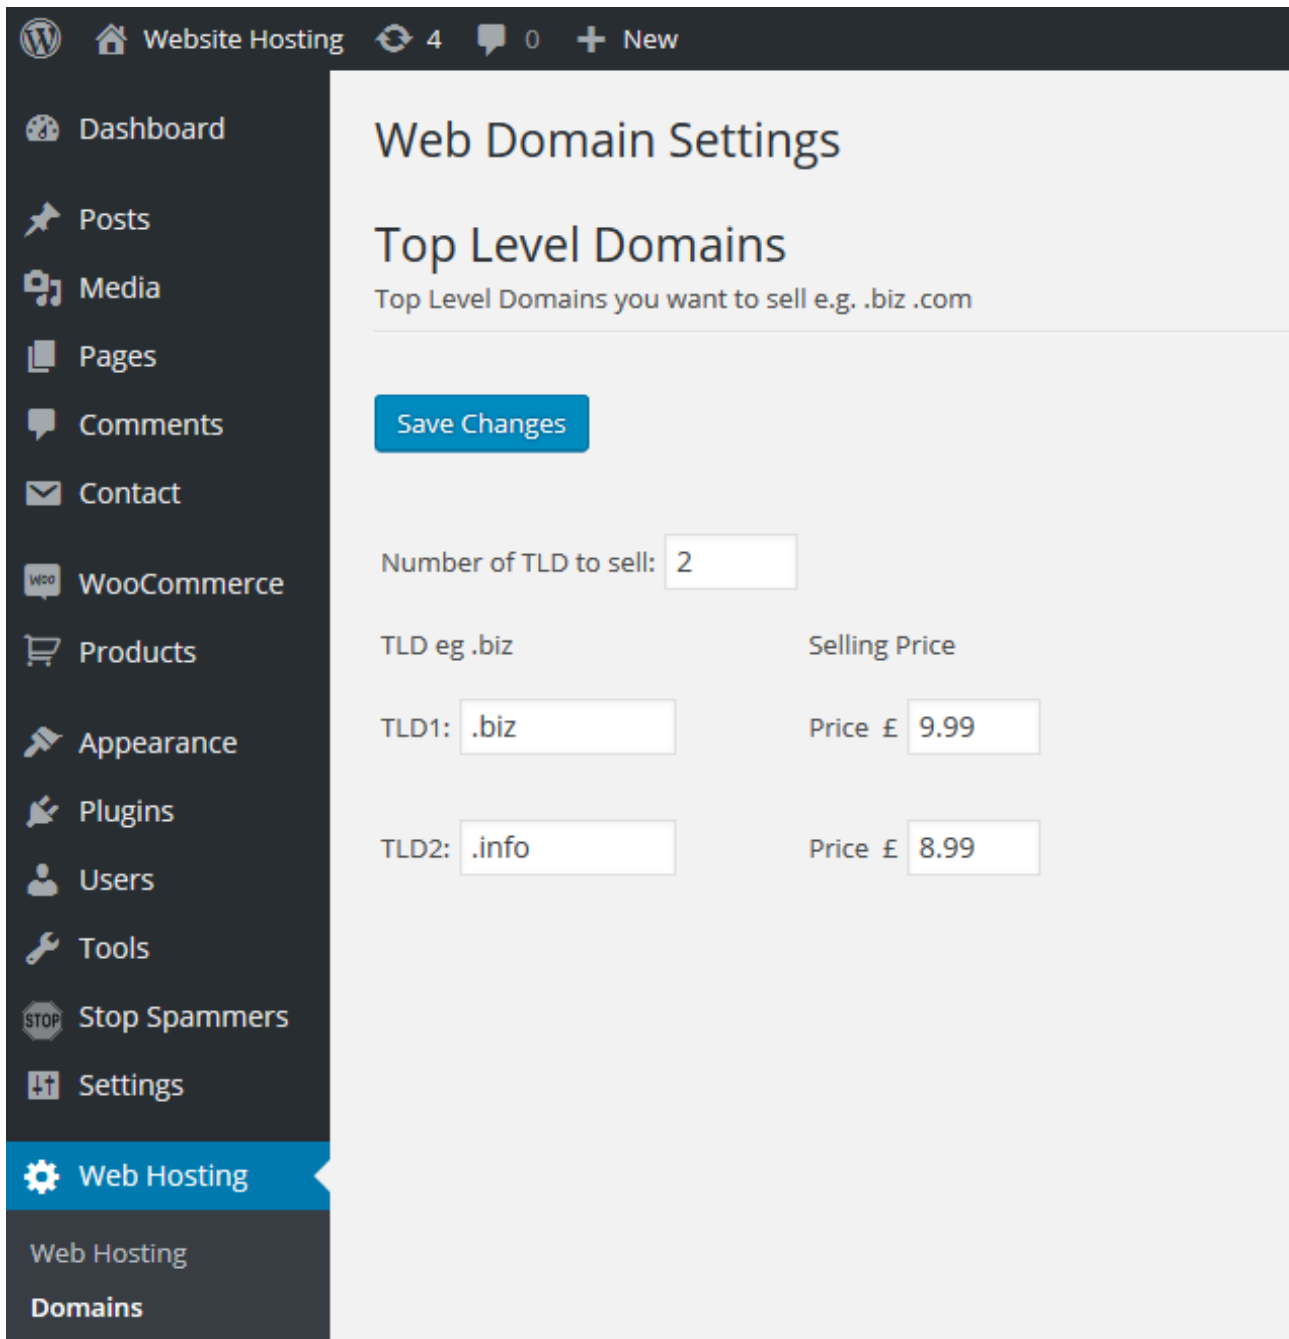

`[wh_transfer_domain_form]` used to create a transfer domain form on any page post. Use Widget WH Transfer Domain Form in any widget area to display the form

Domains

In left-hand admin menu go-to Web Hosting → Domains

enter in the first box (Number of TLD to sell:) the number of TLD's you wish to sell then click save this will create the required number of boxes needed. Enter the TLD's and your selling prices. Click Save Changes again.

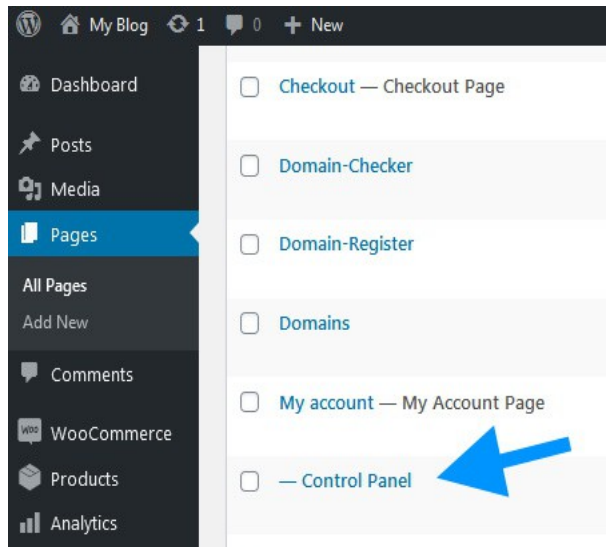

The screenshot shows the WordPress admin interface. The top navigation bar includes the WordPress logo, a home icon, 'Website Hosting', a refresh icon with '4', a comment icon with '0', and a '+ New' button. The left sidebar menu lists various admin areas: Dashboard, Posts, Media, Pages, Comments, Contact, WooCommerce, Products, Appearance, Plugins, Users, Tools, Stop Spammers, Settings, Web Hosting (highlighted), and Domains. The main content area is titled 'Web Domain Settings' and 'Top Level Domains'. Below the title is a subtitle: 'Top Level Domains you want to sell e.g. .biz .com'. A blue 'Save Changes' button is positioned above a form. The form contains a label 'Number of TLD to sell:' followed by a text input field with the value '2'. Below this is a table with two columns: 'TLD eg .biz' and 'Selling Price'. The table has two rows: the first row shows 'TLD1: .biz' and 'Price £ 9.99'; the second row shows 'TLD2: .info' and 'Price £ 8.99'.

TLD eg .biz	Selling Price
TLD1: .biz	Price £ 9.99
TLD2: .info	Price £ 8.99

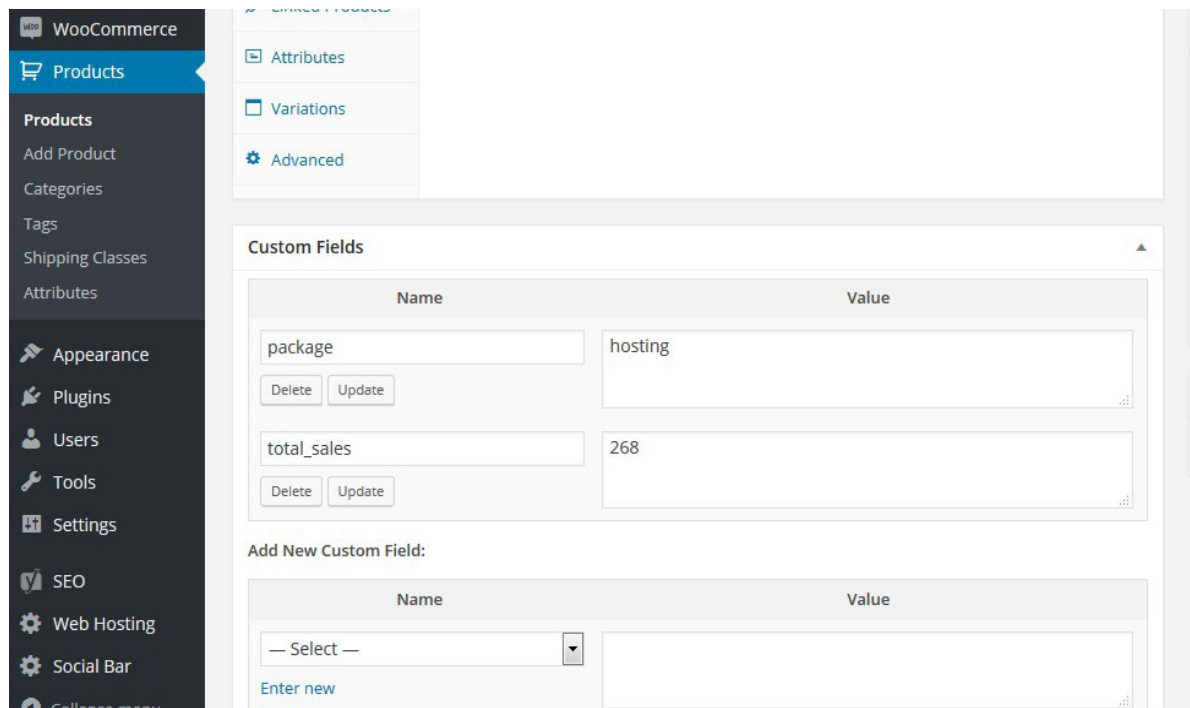

My Account

[wh_extra_fields] Create a new page called Control Panel with the parent page being My-Account and place the shortcode in this page.

Adding Hosting Packages

Just create your product as normal but you will need to add a custom field called package with a value called hosting. This is so the plugin can tell the difference between hosting products and domain products.
To view custom fields if its hidden click on Screen Options at the top of the page and check Custom Fields.

Web Hosting plugin also supports variable product prices ensure you use Cost as the Name; and £0.00 **per month** and £0.00 **per year** in the value(s): just replace £0.00 with your own prices.

--	--

When naming hosting products the name must match your package name on WHM for example

package name on WHM = webuk_basic-shared-hosting
your product name = basic-shared-hosting
